

4kW SOLAR POWER PACKAGE

TRINA/SMA

16 X Trina Honey
Module Panels

1 X 4000TL
SMA Sunny Boy
Inverter

Full solar
mounting system

Full electrical
inspection
(ACT Only)

Total supply,
installation and
maintenance

This system could
save you up to
\$900.00 per year!

Why solar?

Cut your power bills

Solar power provides a way to hedge against rising electricity costs. Your solar system will produce electricity free of charge for 25 years. A small investment now will reduce or entirely eliminate the impact of pending electricity price rises.

In the ACT, any credit of kWh your system produces can be offset on other utility bills such as gas or water. In NSW, it's as simple as getting a cheque in the mail!

Reduce your environmental impact

Don't rely on Governments alone. Take responsibility for the impact your home has on the environment. Solar power is a small personal investment.

Take advantage of incentives... while they still exist

Using the Federal Government's STC subsidy, you'll get a better return on your solar investment. By selling your STC's, your system cost will be cheaper and pay itself off sooner.

Why us?

The ACT solar market and installation requirements are slightly different to NSW metro areas and other major cities, so it's important to source a product locally, from a company that knows the relevant regulations, and that has a vested interest in the market for long term.

We are fully accredited solar specialists and have undergone all relevant training in the solar field.

We've done our research and only recommend products that are specifically suited to our local climate.

We take the time to talk to you about your electricity usage, home electrical products and 'physically' get on your roof and work out an effective design to ensure maximum return on investment.

We guarantee all our work, because we do all our work – no part of any solar installation is subcontracted.

ELECTRICAL EXCELLENCE

SUNNY BOY

3000TL 4000TL 5000TL

The transformerless Sunny Boy generation

High yields

- Maximum efficiency of 97%
- Multi-string technology*
- Transformerless, with H5 topology
- Shade management with OptiTrac Global Peak

Safe

- Integrated ESS DC switch-disconnector

Simple

- Easily accessible connection area
- Cable connection without tools
- DC plug system SUNCLIX

Communicative

- Bluetooth® technology as standard
- Multilingual graphic display
- Multi-function relay as standard

PRODUCT
WARRANTY

TSM-PC05A – TSM-PA05A

The Honey Model by Trinasolar

-  Module can bear snow loads up to **5400Pa** and wind loads up to **2400Pa**
-  Guaranteed power output **0~+3%**
-  High performance under low light conditions
Cloudy days, mornings and evenings
-  Independently certified by **international certification bodies**
-  Manufactured according to International Quality and Environment Management System Standards **ISO9001, ISO14001**
